

Innovators and Solutions providers for home and Personal care products from renewables

Experts in “Green” Surfactants and Specialities

## OVERVIEW

Trivedi Groupe was established in 1975 and Trivedi Enterprises Pvt. Ltd. (TEPL) is the flagship company of the group in India and having expertise in surfactants (anionic, non-ionic, amphoteric, and cationic) from renewables and blends for home and personal care use.

Product development and R & D activities are located at Silvassa in India

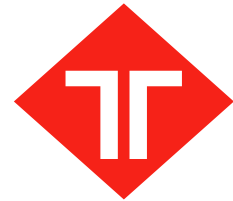

Surfactant Specialities Pvt Ltd (SSPL) established in Singapore meets global requirement for specialty and green surfactants through 3P manufacturing in different geographies. SSPL also specializes in blended products for home and personal care use including affordable Ultraconcentrated cleaners from renewables for machine and hand wash applications.

Trivedi Groupe founder, Mr. Sanjay Trivedi, a Chemical Technologist from IIT Kanpur, who graduated in 1975, has over 47 years' experience of building plants in different geographies for surfactants, specialties, and blends.

The group is managed by a team of professional managers.

## SERVICES

1. Technologies for surfactants blends and ultraconcentrated products from renewables
2. Surfactant Market Research, analysis, and development activities
3. Manufacture of Surfactant Blends and Ultraconcentrated products
4. Supply and trading in Detergent Alkylates, Surfactants (Anionic, Cationics, Non-ionic and Amphoteric) and specialties (green Surfactants)

## Technologies and Plants Offered

### A. Green Surfactants

1. Betaines – Coco Betaine and Coco Amido Propyl Betaines (Using fatty acids C1214, C1218 and Oil CNO / PKO)
2. Amine Oxide (Lauramine Oxide, Coco Amido Propyl Amine Oxide)
3. Amides – Mono and Di (Using fatty C1214, C1218 and CNO / PKO)
4. BKC, 50/80
5. Glycinates and Imidazoline based amphoteric (Coco Ampho Acetate / Coco Ampho Carboxy Propionate / Coco Ampho Propyl Sulphate)
6. Sulfosuccinates
7. Polyquaterniums–synthetic hair conditioning agents (PQ11, PQ7)
8. Quaternary compounds for fabric softening and Ester Quats
9. Sarcosinates
10. IP Esters (IPP, IPM)
11. Esters for Lube Applications (Using Pentaerythritol)
12. PEG Esters
13. Poly glyceryl esters
14. Stearates
15. Alkyl Poly Glucosides (C810 and C1214)

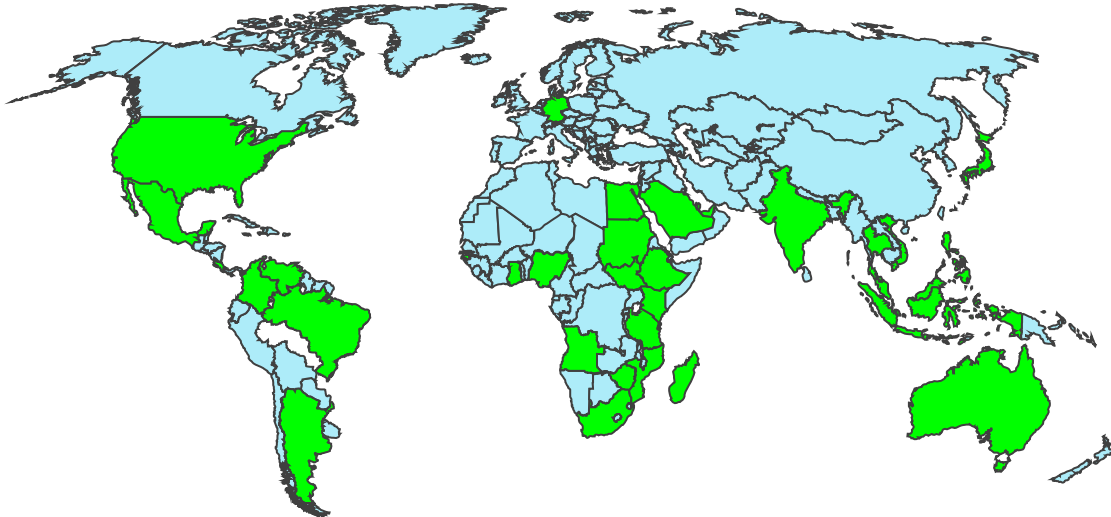

### B. Primary surfactants from renewables

1. Alcohol Sulphates
2. Alcohol Ether Sulphates
3. Alcohol and Ester based non-Ionics
4. Methyl Ester Sulfonates

### C. Custom blends of ultraconcentrated cleaners

## Global Footprint

Green Surfactant Plant

Modular Plant For Speciality Chemicals
